EXPERIENCE

March 2023 - Current

Full Stack Developer and Analyst, NEORIS

- **Full Stack Development:** I am responsible for the development and maintenance of several applications related to economics, employment, and environmental management for the Community of Madrid. On the backend, I primarily work with Java Spring Boot. For frontend development, I use proprietary frameworks from the Community of Madrid (Atlas1, Atlas2, FW2, FW2R), which are based on JavaScript, XHTML, JSP, CSS, and SCSS. I am also involved in the development of RESTful APIs, microservices and Angular applications.
- **Database Management:** Experienced in managing Oracle and MySQL databases, with extensive programming skills in SQL and PL/SQL. I handle development, maintenance, and migrations for various database systems.
- **Problem Solving and Incident Management:** Actively resolve technical issues and incidents for the customer, improving system reliability and user satisfaction. Maintaining communication with the customer, performing detailed problem analysis and implementing effective solutions.
- **Project Estimation and Task Management:** I prepare assignment valuations and timeline estimates, ensuring clear communication with clients and timely delivery of high-quality solutions.
- **Cross-Functional Collaboration:** I work closely with teams from various industries to manage new assignments, contributing to a strong and collaborative work environment.

EDUCATION
